

EC4H Tutor Training Programme 2013

15 Senior clinicians attended one of two tutor training workshops. Intensive coaching and practice on delivery of interactive demonstrations and participant role play was provided, along with training in effective group work and evidence-based approaches to key communication challenges in clinical practice, teaching and management. Pre-course evaluations (15), post-course (15).

Would you recommend this workshop to a colleague? 100% YES

Comments:

- **The adult learning environment and using experiential teaching and learning methods**
- **Having the opportunity to reflect on both the content and process of teaching by being in different roles - interviewer, observer**
- **So many helpful hints and tips - types of questions for the group "What is effective /Why" "What is the impact..." also how to engage with all group members and the message of completing difficult role plays and finishing with success.**
- **Atmosphere of the workshop and encouragement of the lead tutors**
- **This is a very challenging workshop as you are having to consider many aspects at once and there is no doubt this comes with time and practice. I learned enormously when I was in 'hot seat' but actually I also learned a great deal from observing others and hearing their feedback. For me that is why the course works so well, everyone is in the same boat.**
- **Glad we were all encouraged to link up with local , experienced tutors - already arranging a workshop with my local group**
- **Thank you-great course**
