

Communication Challenges for Specialty Trainees & Senior Nurses/ AHPs Edinburgh - August 2013

- 9 participants attended this two-day, multi-disciplinary, advanced communication workshop focusing on clinical scenarios, professional communication and team working challenges based on situations brought from their own clinical practice.
- Participants completed pre-course (9) and post-course evaluations (8)

Very friendly and supportive trainers who kept the course atmosphere very professional but almost "informal" and that helped a lot in expressing my worst fears related to the communication challenges, Thanks!
