

## ‘Communication Challenges in Clinical Practice Workshop for specialty trainees and senior nurses - Edinburgh: Sept 2012

Eight participants attended this two-day, multi-disciplinary, advanced communication workshop. The participants agreed an agenda at the start of the workshop based on situations from their own practice.

Participants completed pre-course (6) and post course evaluations (5)

### Comments

- Really enjoyable..... I learned lots; really looking forward to applying some of it in practice
- Excellent facilitators, enthusiastic and supportive..... well structured course - highly valuable!
- Working through your own scenario is particularly effective. Helps you reflect on how the situation was in practice and how you might have approached this differently. It provided solutions/suggestions to use in the future.
- Always nice to meet other healthcare professionals from other disciplines and areas and share their experiences and how they have overcome obstacles -always reaffirming to know that others face the same challenges
