

Advanced Communication Workshop for Senior NHS Managers Edinburgh: March 2013

11 participants attended this two-day, multi-disciplinary, advanced communication workshop focusing on management challenges such as job planning, poor performance and teamwork based on situations from their own practice.

Participants completed pre-course (11) and post course evaluations (9).

"The course was excellent and there cannot be a consultant in who would not benefit from it. I have already contacted all the consultants in my team and enthused about it to them. Every part of both days was valuable. Congratulations on putting together such a high quality and influential programme."

Clinical Lead, NHS Lothian
